

BRANCH OUT

Building and improving language skills can get students through the door and prepare them for future success.

A pathway for your program can include curricular innovation with other departments, service-learning opportunities, or cooperation with national organizations to identify ways in which your students can put their language skills to work!

Collaborate with colleagues in STEM and beyond to recognize language skills as complementary to their fields, and vital to students' future success in a global economy.

INTERDISCIPLINARY CONNECTIONS THAT MIGHT INSPIRE YOUR PROGRAM:

HUMANITIES+

Brigham Young University has developed an innovative program which provides an experiential add-on to humanities majors that supports each course of study with a course of experience (study abroad, internship, etc.) to prepare students for their future careers and expand their opportunities.

Visit their site to see the international programs being offered by the Kennedy Center: <https://kennedy.byu.edu/isp/find-your-program/>

ECONOMICS+

Georgia State University's International Economics and Modern Languages Program combines an economics major with a focus in a world language and prepares students for careers abroad and with international companies. Graduates have accepted positions at Hartfield Philips Inc., SunTrust Bank, Emory Law, the Tax Foundation, the Federal Reserve and the OECD Secretariate in Paris.

According to GSU, "An undergraduate degree in economics prepares students with the quantitative and qualitative skills to think critically and learn how to make optimal decisions."
